#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***DETAILED ACTION***

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13, drawn to a fuel cell cathode.

Group II, claim 14, drawn to a method of operating a polymer electrolyte fuel cell.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common subject matter between Groups I and II is a fuel cell comprising an anode, a cathode, a polymer electrolyte membrane disposed between the cathode and anode wherein the cathode has an oxygen absorbing releasing material comprised of one or more cerium oxide compounds which is in contact with a catalyst. The common subject matter does not make a contribution over the prior art (see Ito et al. (US Patent Application 2003/0004054 A1) in view of Hori et al. (US Patent Application 2003/0134180 A1). Group II discloses that the method comprises feeding hydrogen gas to the oxygen absorbing/releasing material comprised of a cerium oxide compound in a pulsed manner before or during operation which is not recited in any claim in group I. Accordingly, Groups I and II lack unity of invention.

Art Unit: 1795

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
